

WE'RE HIRING!

Android Developer - Belgrade, Serbia

Dominion Voting is searching for a highly technical and passionate **Android Developer** to join our team in Belgrade! This position will be responsible for providing high-level technical expertise to design development, coding, testing and debugging of new voting system software and/or enhancing existing software for our customers. This position will work on a team utilizing an Agile development environment.

Responsibilities

- Assist in the design and development of voting system software products
- Analyze highly complex business requirements, designs and write technical specifications
- Assure quality, security and compliance requirements are met
- Provide coding directions to less experienced staff
- Participate in upgrading current products' design and implementing optimal changes as needed in order to meet the regulatory compliance requirements
- Provide product expertise to customers and colleagues across all Dominion Voting product lines
- Maintain understanding of product development schedules and adhere to all deadlines
- Participate and contribute to all product design reviews
- Work closely with the QA Analysts on software quality testing projects and debugging
- Assist the Operations Team when needed with customer support activities

Qualifications

- Bachelor's degree in Electrical Engineering or Computer Science (ETF, FON, PMF or similar) or equivalent job experience is required
- 5+ years of experience with software design and development
- 2+ years of experience with Agile Development methodologies and frameworks including Scrum
- Strong technical skills with Java and understanding of Android SDK
- Work experience in collaborative teams using revision control systems e.g. Git or SVN
- Experience with Object Oriented (OO) design, concurrency and design patterns
- Experience with SQLite database implementation and programming
- Experience with Android Native App Development (NDK) and comfortable with C/C++
- Understanding of Debugging and Memory Analysis tools
- Experience with development of unit tests and test driven development
- Strong organizational skills to include multi-tasking and time management
- Advanced English language communication skills (written and verbal) is required
