

WE'RE HIRING!

QA Analyst III - Toronto

Dominion Voting is seeking a technical and passionate **QA Analyst III** to join our team in our downtown Toronto office! This position will be responsible for quality assurance of DVS products; ensuring that products and services comply with all regulations and required functionality; and verifying that all products and services either meet or exceed the requirements specified by the customers and guaranteed by the company.

Responsibilities

- Set up, install and configure test equipment and test beds
- Assist with System Test plan and coverage based on release content
- Design, write, maintain and execute automated and manual test cases, test scenarios and test scripts including regression test, functional tests and data tests.
- Design and perform load and performance testing through a combination of automated and manual tests
- Create test processes for new and existing software products
- Define and evaluate test automation strategies
- Encourage adoption of automation best practices throughout the Scrum agile based, software development life-cycle
- Work with development team to resolve software bugs/defects
- Generate and report on test metrics

Qualifications

- Four year degree from an accredited university in a technical field
- A minimum of 4 years of experience. Master's degree may be substituted for 1 year experience.
- A minimum of two (2) years of experience working in a team using Agile Development methodologies (Scrum)
- Experience with software tools such as Jira, Selenium, TestComplete, SpiraTeam and other test automation and management platforms
- Experience with testing web and mobile (Android or iOS) software applications
- Well-versed in all testing methodologies (white vs. black box test work, system vs. functional)
- A solid understanding of quality assurance as part of the development process
- Detail oriented and problem solver
- Advanced level English language communication skills
- Ability to work in a rapidly changing environment
- Knowledge and understanding of software programs
- Ability to establish and maintain business relationships with customers.
- Ability to analyze problems and identify potential solutions and preventive measures.
