

# WE'RE HIRING!

## Manager, Software Development - Belgrade, Serbia

Dominion Voting is searching for a highly-technical and passionate **Manager, Software Development** to join our team in Belgrade, Serbia! This position will manage a team of Software Developers and QA Analyst who are tasked with designing, developing, coding, testing and debugging of new voting system software and/or significant enhancements to existing software for our customers. This position will lead a team utilizing an Agile development environment.

### Responsibilities

- Lead a team of Software Developers and QA Analysts in the design and development of voting system software products for our customers.
- Participate in upgrading current products' design and implementing optimal changes as needed in order to meet the regulatory compliance requirements.
- Provide product expertise to customers and colleagues on Dominion Voting product lines.
- Maintain understanding of product development schedules and adhere to all deadlines.
- Participate and contribute to all product design reviews.
- Work closely with the QA Analysts on software quality testing projects and debugging.
- Assist the Operations Team when needed with customer support activities.
- Hire, manage, mentor and develop the talent within your team.

### Qualifications

- Bachelor's degree in Computer Science (or similar) or equivalent job experience is required.
- 7+ years of experience in the design and development of software.
- 3+ year of experience with Agile Development methodologies and frameworks, including Scrum and XP for managing the entire software development lifecycle.
- Experience managing and mentoring multi-disciplined teams.
- Strong technical skills in .NET, C# (Windows) and/or Java (Android)
- Experience with Microsoft ASP.NET / MVC and WCF web services.
- Experience with MS SQL Server DBMS database implementation and programming.
- Knowledge of HTML / CSS, JavaScript / Ajax / jQuery and XML.
- Excellent verbal and written communication skills.
- Strong organizational skills, to include multi-tasking and time management skills.
- Knowledge and understanding of industry best practices for Object Oriented development.
- Ability to establish and maintain business relationships with customers.
- Ability to analyze problems and identify potential solutions and preventive measures.
