

# WORK AT DOMINION VOTING!

## Full Stack .Net Developer - Toronto

**OUR COMPANY OFFERS HIGH-IMPACT, CHALLENGING, FAST-PACED, & REWARDING CAREER OPPORTUNITIES**

Dominion Voting is searching for a highly technical and passionate **Full Stack .Net Developer** to join our team in downtown Toronto! This position will be responsible for providing high-level technical expertise to design development, coding, testing and debugging of new voting system software and/or significant enhancements to existing software. This position will work on a team utilizing an Agile development environment.

### KEY JOB RESPONSIBILITIES:

- Assist in the design and development of voting system software products for our customers.
- Participate in upgrading current products' design and implementing optimal changes as needed in order to meet the regulatory compliance requirements.
- Provide product expertise to customers and colleagues on all Dominion Voting product lines.
- Maintain understanding of product development schedules and adhere to all deadlines.
- Participate and contribute to all product design reviews.
- Work closely with the QA Analysts on software quality testing projects and debugging.
- Assist the Operations Team when needed with customer support activities.
- Design and work on REST based APIs that are secure, versioned and can efficiently handle high throughput/large data applications
- Work with technologies like HTML5/Javascript/CSS, ASP.NET, ASP.NET WebAPI, C#, SQL Server, Entity Framework, JSON/XML etc.

### THE SUCCESSFUL CANDIDATE WILL POSSESS:

- Bachelor's degree in Computer Science (or similar) or equivalent job experience is required.
- 3+ years of experience in the design and development of software.
- 1+ year of experience with Agile Development methodologies and frameworks including Scrum and XP for managing the entire software development lifecycle.
- Experience with .NET, C#, LINQ, Entity framework programming
- Experience with HTML5/ Knockout/CSS (AngularJS, Angular 2 and TypeScript are a plus)
- Experience with Microsoft ASP.NET / MVC and WCF web services and REST based services.
- Experience with MS SQL Server DBMS database implementation and programming.
- Excellent verbal and written communication skills.
- Strong organizational skills to include multi-tasking and time management skills.
- Knowledge and understanding of industry best practices for Object Oriented development.
- Ability to establish and maintain business relationships with customers.
- Ability to analyze problems and identify potential solutions and preventive measures.
