

QA Analyst - Belgrade, Serbia

Dominion Voting is searching for an experienced and passionate **QA Analyst** to join our team in Belgrade, Serbia! This position is responsible for ensuring that all products and services comply with all regulations and required functionalities; verifies that all products and services either meet or exceed the requirements specified by the customers and guaranteed by the company.

Responsibilities

- Use product backlogs and design documents to write, maintain and execute automated and manual test cases, test scenarios and test scripts
- Develop and maintain test plans, manual and automated test scripts for user interfaces, functionalities, system, and ad-hoc testing
- Create test processes for new and existing software products
- Define and evaluate test automation strategies
- Execute regression, functional and data tests
- Lead an automation project from conceptualization to implementation
- Enforce adoption of best automation practices throughout the Scrum agile software development life-cycle
- Work with the development team to resolve software bugs/defects
- Utilize appropriate tools for defect tracking and issue resolution

Qualifications

- Bachelor's degree in Computer Science (or similar) or equivalent job experience is required
- A minimum of two (2) years of experience working in a team using Agile Development methodologies (Scrum)
- Experience with software tools including Jira, TestRail, SpiraTeam and other test management tools
- Experience applying test automation practices using TestComplete, Selenium, Squish or similar will be considered a plus
- Experience with testing web and mobile (Android or iOS) software applications
- Well-versed in all testing methodologies (white vs. black box test work, system vs. functional)
- ISTQB Foundation level certification will be seen as an advantage
- A solid understanding of quality assurance as part of the development process
- Detail oriented and a problem solver
- Advanced English language communication skills
- Ability to work in a rapidly changing environment
