WE'RE HIRING!

Senior Full Stack .Net Developer - Belgrade, Serbia

Dominion Voting is searching for a highly technical and passionate **Senior Full Stack .NET Developer** to join our Belgrade team! This position will be responsible for providing high-level technical expertise to design development, coding, testing and debugging of new voting system software and/or significant enhancements to existing software for our customers. This position will work on a team utilizing an Agile development environment.

Responsibilities

- Add high-level, technical expertise to the design and development of voting system software products for our customers.
- Participate in upgrading current products' design and implementing optimal changes as needed in order to meet the regulatory compliance requirements.
- Provide product expertise to customers and colleagues on all Dominion Voting product lines.
- Maintain understanding of product development schedules and adhere to all deadlines.
- Participate and contribute to all product design reviews.
- Work closely with the QA Analysts on software quality testing projects and debugging.
- Provide support to and mentor junior software developers on the team.
- Assist the Operations Team when needed with customer support activities.
- Design and work on REST based APIs that are secure, versioned and can efficiently handle high throughput/large data applications
- Work with technologies like HTML5/ Javascript/CSS, ASP.NET, ASP.NET WebAPI, C#, SQL Server, Entity Framework etc.

Qualifications

- Bachelor's degree in Computer Science (or similar) or equivalent job experience is required.
- 8+ years of experience in the design and development of software.
- 5+ year of experience with Agile Development methodologies and frameworks including Scrum and XP for managing the entire software development lifecycle.
- Strong technical skills in .NET, C#, LINQ, Entity framework programming
- Experience with Microsoft ASP.NET / MVC and WCF web services and REST based services.
- Experience with MS SQL Server DBMS database implementation and programming.
- Experience with HTML5 / CSS, JavaScript / Ajax / jQuery (Knockout, React JS, AngularJS, Angular 2 and TypeScript are a plus)
- Excellent verbal and written communication skills.
- Strong organizational skills to include multi-tasking and time management skills.
- Knowledge and understanding of industry best practices for Object Oriented development.
- Ability to establish and maintain business relationships with customers.
- Ability to analyze problems and identify potential solutions and preventive measures.
