

# COME SUPPORT DEMOCRACY!

## WHO WE ARE:

Dominion Voting Systems is a technology company that develops and supports elections systems for government customers in Canada, the United States, and abroad. We have set ourselves apart with a commitment to customer service, transparency, and innovative technology. We are a fast-paced, results driven organization, and we have been listed as one of Deloitte's 50 fastest growing firms!

## WHY YOU SHOULD JOIN OUR TEAM:

We are committed to providing a positive, casual, and flexible work environment focused on team-work, innovation, and promoting from within. We offer comprehensive compensation packages that include competitive salaries, bonus incentives, company paid benefits, retirement matching and support for training & continuing education.

## WHAT WE ARE LOOKING FOR:

We are looking for Senior, Mid-level, and Associate-level Software Developers who are motivated, inquisitive, and who want to apply their passions to make a difference in the world! If you enjoy a team environment where you directly impact the success of the business—we want to speak with you!

### Responsibilities:

- Provide expertise in the design development, coding, testing, reviewing and debugging of new software and/or significant enhancements to existing software.
- Participate in upgrading current products' design and implementing optimal changes to meet regulatory compliance requirements.
- Develop new functionality according to product specification.
- Generate training material and conduct training sessions as required.
- Must be detail-oriented with the ability to learn new technologies and libraries through self-study.

### Qualifications:

- Undergraduate degree in Computer Science or Electrical Engineering is preferred.
- Technical skills in C# , .NET Core, SQL Server, Angular, Entity Framework and JavaScript/Typescript.
- Experience with MS Azure and/or cloud-based software development is a plus.
- Strong foundation of programming concepts such as object-oriented programming, multi-threading, data structures, design patterns.
- Ability to produce clean, robust, and accurate code that meets the specification.
- Ability to analyze problems and identify potential solutions and preventive measures.
- Strong organizational skills to include multi-tasking and time management skills.
- Excellent verbal and written communication skills.
