

# WE'RE HIRING!

## QA Analyst I - Toronto

Dominion Voting Systems is searching for a passionate and driven recent-graduate to join our Systems Integration Test team in Toronto as a **QA Analyst I**. We are a global technology company that develops cutting-edge and innovative election solutions and systems (hardware & software) which are utilized by over 1,200 jurisdictions in North America and abroad.

In the **QA Analyst I** position, you will join a team that is responsible for end-to-end testing of our systems to ensure that our products and services comply with all regulations and required functionality and that they either meet or exceed the requirements specified by the customers. In this role you will directly impact the ability for our customers to successfully execute fair, accessible, and secure elections!

### Responsibilities

- Support the set-up, install, troubleshooting, and configuration of test equipment and test beds
- Learn to design, write, maintain and execute automated and manual test cases, test scenarios and test scripts including regression test, functional tests and data tests.
- Assist with creating System Test plans and coverage based on release content
- Contribute to the design and execution of load and performance tests using both automated and manual tests
- Assist with the creation of test processes for new and existing software products
- Work with development team to resolve software bugs/defects
- Generate and report on test metrics
- Execute other tasks as needed and assigned

### Qualifications

- Recent graduate with a degree from an accredited university in a technical field such as information technology (IT), business technology management, computer systems technology, etc.
- Experience installing, configuring and maintaining personal computers, servers, networks and related technology hardware and software.
- Ability to identify, troubleshoot, and resolve basic computer & technology system malfunctions and operations problems.
- Previous experience testing web and mobile (Android or iOS) software applications is a plus
- Exposure to working in a team using Agile Development methodologies (Scrum) is a plus
- Exposure to software tools such as Jira, Selenium, TestComplete, SpiraTeam, etc. is a plus
- Basic knowledge of MS SQL such as the ability to run queries, and filter, modify and sort data is a plus
- A team player who wants to learn, is detail oriented, and enjoys solving problems
- Have the ability to thrive in a dynamic environment and industry with strict deadlines and guidelines
